

Career Summary

Resume of Dr. Blaine Leckett

With over 20 years in the academic and medical industries and 25 years in business development, I am a confident leader that can take small companies and start-ups to the next stage of growth and profit independence.

My skills include soliciting and developing relationships with technology-oriented companies, and developing novel/innovative solutions to drive product sales, company growth, and expansion.

With a hands-on approach to small business development, I've been responsible for hiring, training, and supervising company staff in order to expand start-up business from 10 to 100 plus employees and to increase revenues to \$30 million/year.

My main strength is in taking a business concept from paper to reality by fully developing a group's infrastructure.

With a background and passion in biomedical sciences coupled with technology, I constantly keep up with today's latest breakthroughs. As such, I can provide a unique and successful approach for any small business looking to expand its horizons.
